Please be advised that Jarrow Formulas, Inc. is marketing a product containing a "Structure and Function" statement on the label. According to the notification requirements set forth by the DSHEA (Dietary Supplement Health and Education Act, 1994) legislation, please be advised of the following:

Name of Product: Chondroitin Sulfate and Type II Collagen Complex, 120 Capsules.

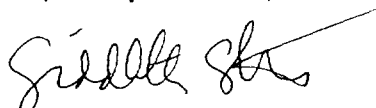

Active Ingredient(s): Bovine Trachea Cartilage

Claim(s): "Supports Joint Function and Connective Tissue Synthesis." Bovine trachea cartilage is a matrix consisting of Type II collagen and glycosaminoglycans (GAGs) such as chondroitin-4-sulfate and chondroitin-6-sulfate. Chondroitins are the main GAGs found in connective tissue and joints. GAGs are polyanions that attract water resulting in enhanced hydration in joints. Type II Collagen is an essential structural protein in cartilage.

The following disclaimer appears on the label: These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

These claims are limited to, and a result of, what we believe to be a substantial body of scientific evidence supporting the functional role of these nutrients. A compendium of relative published research substantiating the above statement(s) is on file at the corporate office.

Respectfully submitted,

Siddharth S. Shastri, B.A., C.C.N.
Director of Product Development

USAGE: As a dietary supplement, take 2 to 4 capsules per day, or as directed by your qualified health consultant.
